ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: A METHOD AND SYSTEMS FOR RESOURCE BUNDLING IN A COMMUNICATIONS NETWORK

(57) Abstract: A method for resource bundling comprises receiving at a network policer (110) a plurality of data flows having different class of service (CoS) priority levels and processing the data flows while sharing a user allocated bandwidth between the different CoS priority levels in a prioritized manner. The method and a system implementing it allow a single user to aggregate multiple CoS, thereby enabling the user to utilize an entire paid-for bandwidth.
